Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-9, 26-34, 18-25, and 43-50, drawn to network computer configuration, classified in class 709, subclass 220.

II. Claims 10-17 and 35-42, drawn to access controlling, classified in class 709, subclass 229.

Inventions I and II are related together as subcombinations as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility, such as the configuration of a computer, which may be performed separately from the other invention. Invention II implements the specific enabling of access, which also may be performed separately.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their distinct classifications, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply for this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
